

# HOW REPLACEMENT WINDOWS CAN BOOST EFFICIENCY

Are the windows you see the world through causing your home to be uncomfortable? Replacing windows can prevent your home from losing heat in the winter and reduce heat gains in the summer, but only if these window issues are considered during installation.

## OLD WINDOW

## NEW WINDOW

- Increased soundproofing
- Secure locking systems
- Dual panes decrease radiant heat
- Airtight installation
- Aesthetic upgrade opportunity

## ENERGY EFFICIENT WINDOW REPLACEMENT WITH ENERGY SAVERS
